(54) METHOD FOR MEASURING GLUCOSYLATED PROTEIN

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a new method for accurately measuring a glucosylated protein in a short time by simple operations on the basis of a principle different from existing enzymatic methods.

SOLUTION: This method for measuring a glucosylated protein in a sample comprises treating the sample containing the glucosylated protein with a protease to release glucosylated peptides, preferably α -glucosylated peptides, especially preferably α -glycosylated dipeptides, from the glucosylated protein, treating the released glycosylated peptides with an oxidase, and then measuring the produced hydrogen peroxide, or measuring the released glucosylated peptides with HPLC. And a measuring reagent kit used for the enzymatic method.

LEGAL STATUS

[Date of request for examination] 14.03.2003

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]
